Subject: Oregon Coordinating Council on OA and Hypoxia (OAH Council)

BTW, there is a DEQ representative (Karen Tarnow, Operations and Policy Analyst) on the Oregon OA Council:

<http://www.oregonocean.info/index.php/ocean-documents/oah-hypox/1627-oah-council-membership-2018/file>

In 2017, the passage of Oregon Senate Bill 1039 created the Oregon Coordinating Council on Ocean Acidification and Hypoxia (OAH Council) to provide recommendations and guidance for the State of Oregon on how to respond to this issue.

The sponsors of Senate Bill 1039, Senator Arnie Roblan (D) and Senator Jeff Kruse (R), recognized that Oregonians depend on our healthy coastal environment for fisheries, tourism, and recreation. They created the OAH Council to assemble interests that are currently and potentially impacted by OAH in Oregon. The OAH Council forum is composed of [_pdfmembers \(279 KB\)](#) of State agencies, academic experts, stakeholders and Tribal interests, who will collaboratively develop recommendations, and advise the State on the implementation of actions to support the sustainability of Oregon's ocean as OAH intensifies. The first OAH Council meeting is on January 25, 2018, with the first official report to the legislature due in September 2018.
